ABOUT ME

I have worked on a variety of projects ranging from user interface design to backend service implementation. I'm passionate about creating efficient, high-quality solutions that enhance user experience and optimize business processes. I'm always seeking new challenges and opportunities to learn and grow professionally.

EDUCATION

EBAC Fullstack Developer Java 2025

EBAC Backend Python 2025

FACULTY of CHEMICAL ENGINEERING

Industrial Chemical Engineering

Languages

Advanced English

SKILLS & COMPETENCIES

HTML, CSS, SASS, JavaScript, Bootstrap, TailWindCSS, Java, Python, ReactJs, Git, GitHub, Spring Boot, Maven, Gradle, MySQL, MongoDB, Django, Docker, Firebase, Vite, Netlify, AWS, NodeJS, Next.js, Tailwind CSS, Spring Boot, Express

Effective communication - Adaptability -
Teamwork - Time Management - Problem
Solving - Leadership

PROJECTS

Integrated Full-Stack System for Warehouse Entry and Exit Management | 2025

- Developed a complete solution using ReactJS, TailwindCSS, and TypeScript for the frontend.
- Implemented Java Spring Boot and MySQL in the backend for a robust architecture.
- Managed warehouse entries and exits efficiently.
- Sent email notifications for Stock Out products.
- Focused on usability, efficiency, and system scalability.

Integrated Full-Stack System for Corrective Maintenance Orders | 2025

- Built a full solution with ReactJS, TailwindCSS, and TypeScript on the frontend.
- Used Java Spring Boot and MySQL for backend development.
- Managed work orders and clients effectively.
- Optimized manufacturing workshop operations through an intuitive interface.
- Prioritized usability, efficiency, and scalability.

Comprehensive Full-Stack System for Machining Workshop Management | 2025

- Created a modern and responsive interface using ReactJS, TailwindCSS, and TypeScript.
- Integrated Java Spring Boot and MySQL to handle business logic and data persistence.
- Centralized management of work orders and clients.
- Streamlined operational processes in manufacturing workshops.

Movie Page Based on an API | 2024

- Developed an interactive web application using HTML, CSS, and JavaScript.
- Consumed a REST API to fetch and display a movie collection.
- Enabled dynamic filtering of results based on various criteria.
- Delivered a smooth and responsive user experience.
- Focused on simplicity and interface efficiency.

Full-Stack Expense Balance Calculator | 2024

- Built a full-stack application to calculate users' financial balance.
- Accurately recorded deposits and withdrawals.
- Used Python and Django for backend logic and data management.
- Designed a modern and responsive interface with TailwindCSS.
- Facilitated personal financial control through an intuitive experience.

Guitar Store Website | 2024

- Developed a web page for a guitar store using ReactJS, TypeScript, and TailwindCSS.
- Designed a modern, responsive, and visually appealing interface.
- Allowed users to easily browse a variety of musical products.
- Integrated reusable components and static typing for robustness and maintainability.
- Focused on usability, performance, and visual aesthetics to boost conversion.
